

## Aurora DeJuliis Skincare Review

When it comes to my skin my biggest issue is that my face is constantly red. When people see me without makeup it never fails – “Why’s your face so red?” is a questions I’m always asked. My blood pressure is fine, I’m not a drinker and I have rosacea. Try getting people who’ve never heard of rosacea to understand it. It’s not easy walking around and everyone staring or asking what’s wrong with your face.

I've grown accustomed to waking up in the morning and using a full coverage foundation with concealer. I think that is what throws most people off because I look totally different without makeup. It would be nice to be able to comfortably walk outside without a thick layer of makeup on. That's what I'm working on right now with **Aurora DeJuliis Skincare line**.

I received the following items and I'm loving how incredible my skin has started to feel after just a week of using them. I can definitely tell a difference; my face is less red, more soft and I think it looks a lot healthier. There's a more vibrant *glow* as opposed to the flat, often flaky, skin I was used to. I can definitely recommend Aurora DeJuliis Skincare products without hesitation! Check them out!
